Who are we?

Smart Home Group, is a Home Automation company **with more than 25 years of experience building the best systems over 76 countries around the world.**

Our mission is to provide the users and families with products that improve every ones wealth and security using affordable components and promoting **The energy saving and care of our environment.**

What is Home Automation?

Home Automation means to provide spaces like homes, buildings, offices, hotels, hospitals and others with technology capable of administrate all its facilities and services like natural and artificial lighting, air conditioning, security, wealth, entertainment, communications, irrigation and electro domestics.
Is the administration of all your equipments in only one central unit, accessible from everywhere around the world.

Our Technology

Smart-Bus is a communication system designed for Home Automation systems. This technology allows to communicate multiples nodes within a single Cat5e cable at any topology. This means that your projects will never be more flexible or cost saving.

Our protocol is 100% open. This way every developer can have access to our source code to modify our products or even make our own, all our developers, installers and integrators can have access to this codes freely. Our only petition is that the projects developed must be with the intention to improve all our products as a family and to help the environment.

Environment

We comprehend our Environment as all the natural or artificial resources that sustain us. This is in crisis and we cannot keep looking aside of this huge problem.

This is why Smart Home Group promotes the home automation reducing the footprint we make to live.

Our products help to create an balanced living style, taking care of all that surround us.

Energy saving is a necessity of today, not tomorrow.

Why change?

With the inclusion of new technologies is possible to create products that breaks paradigms. Smart Home Group looks to improve our lifestyle under five columns:

+ Security
+ Welfare
+ I & D (Research and Develpment)
+ Energy Saving
+ Communications

| security	welfare	R&D	energy saving	communications

SMART HOME

The technology you deserve in your home.

Control your home is not only to administrate things from your smartphone...

is to imagine a place that interacts according to your wishes.

Create unforgetable experiences

Imagine to enter your home by biometric signatures, where a place with the perfect illumination and temperature is waiting for you at any time for the day.

Being in the mood to share with friends in a relaxed atmosphere or seeing your favorite movie, **let Smart Home help you enjoy every bit of your life!**

Lighting

Have your ever considered how much lighting can change your mood and the perception of all that surrounds you?

To control your lights with Smart Home is the easiest and smarter way by having the best panel in your wall.

Now your kitchen can become the heart of your home having fun with friends, a place where everything can become real either with family or friends under the right atmosphere.

Energy saving

✔ Cost reduction thanks to automatization of tasks.

✔ Eficient temperature control.

✔ Administrattion of electric consume.

✔ Integration with green power systems.

Security

Our advanced system of security includes a biometric lock so you can choose who can enters your home. Also, you can check in real time -live stream- your cameras from your smartphone, computer or tablet anywhere in the world.

If your alarm system activates, all the lights switch on and you can program automatic sms or emails to your loved ones.

Go out on vacations is not leaving a place abandoned, is to use a simulator of presence 24 hours a day , keeping your house safe and never again alone.

→ Presence simulator.
→ Fire, water and smoke detectors.
→ Live video from your cameras.
